

WHICH ASTHMA IS YOURS?

Not all asthma is alike. If yours is interfering with work, sleep and enjoying life—even though you have been taking your medications and following doctor’s orders—you may have hard-to-control asthma. There are several kinds.

Taking back control starts with learning more and working with your doctor to get the right diagnosis and treatment that is best suited to your asthma.

WHY YOU NEED TO BECOME AN “ASTHMA MANAGER.”

MANAGING YOUR ASTHMA BEGINS WITH YOU.

START WITH THE FACTS.

Did you know there are many kinds of asthma that are harder to control? Learn more.

Understand uncontrolled asthma.

“OWN” YOUR NEXT DOCTOR VISIT.

Knowing what to tell and ask your doctor can help in getting the right diagnosis.

Make every visit count.

COULD YOUR ASTHMA BE SEVERE EOSINOPHILIC ASTHMA ?

Severe Eosinophilic Asthma (S.E.A.) is one type of hard-to-control asthma. Learn its causes, how it’s diagnosed and more.
